

To help us provide better patient care, Summit Medical Group is participating in The U.S. Department of Health and Human Services' "Meaningful Use" program. As part of this program, we need to collect more patient information, such as your race and ethnicity.

The patient population within our practice and in doctor's offices across the country, is more diverse than ever. It is very important to understand how different diseases, illnesses, and treatments affect different people.

If you prefer not to share this information, simply choose that option below.

Name: _____ Date: _____
